

**COSMIC HEALTH RESTORE SDN BHD** (848966-W)

( Formerly known as COSMIC NATURE HEALTHCARE SDN BHD )

**Energize your life !**

Wisma Cosmic  
NO. 2A Jalan Rampai Niaga 1, Rampai Business Park,  
Taman Sri Rampai, 53300 Setapak, Kuala Lumpur, Malaysia.

## Energy Life Water

The pH value of healthy body fluid is between 7.35- 7.45. Medical research has proven that spasm occurs when the pH value of blood fluid reaches 7.1; people may become vegetables when the pH value of blood fluid reaches 6.9 or even die when the value reaches 6.8. Only under alkaline environment, can human cells maintain activity, metabolism be active, wastes be evacuated and the body be under good condition.

**Energy Life Water Cup** is similar to micro electrolytic water machine, which can produce good drinking water that is mild alkaline, negative potential, small molecular groups, high oxygen content and proper amount of mineral substances.

# Ingredients

## MUYU STONE

It is rare hallow stone and a precious Chinese Traditional Medical Material, which has body strengthening, good tolerance to cold and heat, hunger free, light weight and life lengthening properties. According to laboratory test, Muyu Stone has over 10 kinds of beneficial trace elements such as metasilicic acid, strontium, molybdenum, lithium, zinc and selenium, be favorable for health care and beautification. Marinate Muyu Stone in the water, then such water may reach the quality mineral water standard five minute later, sweet and tasty. Owing to this fancy efficacy, Muyu Stone is also called 'NO.1 CHINESE SACRED STONE'. Drink water by Muyu Stone cup for long term can prolong aging and lengthen life. Drink tea by tea set made by Muyu Stone for long term can regulate metabolism and soften blood vessel to prevent arteriosclerosis.

## MEDICAL STONE

As a natural health healing stone, Medical Stone is mainly composed of silicic acid and alumina, including petrosilex constituted by necessary iron, calcium, manganese, magnesium and other inorganic materials. Water is the foundation of health and the lifeline of food and beverages. Medical Stone is an ideal water purificant and modifier owing to its intensive absorption to heavy metals in water such as lead, cadmium, hydrargyrum, arsenic and hexavalent chrome. The Medical Stone marinated in water can absorb injurious elements and bacteria colonies produced by water pollution and purify the water to clean and active mineral water, and then dissolve out favorable mineral materials and trace elements to the water. Long-term drinking can removes the harmful materials accumulated in body, regulate metabolism and promote blood circulation. With efficacies such as urination promoting, stomach strengthening and liver protecting, it is also called 'CELL CLEANER'.

## TOURMALINE

Tourmaline has health-care efficacies

- i. Tourmaline is a complicated silicate mineral material, and it is also called tourmaline owing to its natural electrical properties. Practices prove that the electricity carried by Tourmaline is static direct current, that is because that Tourmaline is a polar crystal, which is it produces positive electrode at one end and negative electrode at the other end naturally and eternally. Such positive electrode and negative produced are usually in an unsteady state, and such unsteadiness and unbalance have generated the electric potential? It is because the existence of electrical potential that the electron runs from the cathode to the anode and such running is the nature why Tourmaline has static electricity. This kind of current is only 0.06mA, which is in line with the biocurrent of our body (0.06mA). This is extremely important to human movement, since the 0.06mA bioelectricity support our health.
- ii. It can ionize the water in a minute and let the fluid of body takes on alkalescency, regulating the body to its optimal state; detoxify the active oxygen to guard the internal environment and defend intrusion of injurious factors; activate cells to ensure normal metabolism, purify bloods to remove toxins; relieve fatigue to ensure vigorous energy, balance the vegetative nervous system; make sure the internal organs run normally; improve resistance to disease to reduce its occurrence; ease pain and nerves; improve allergic conditions and prevent occurrence of immunity of allergic disease; prolong aging and promote health.
- iii. It can radiate far infrared whose wave is 4-14 micron (the so-called light of life), which matches the far infrared wave of body, thus to improve microcirculation.

## NANOMETER STONE

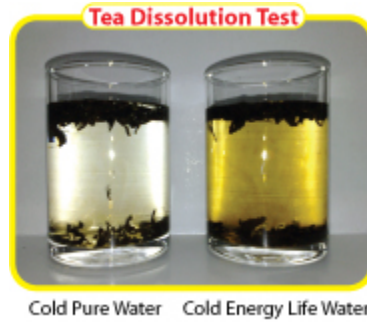

Adjust the pH value and conductivity of water to make the water be alkalescency; break in the water molecular chain to form small clusters of water, in order to have the molecular chain of active water be shorten and improve its penetrability, solvency, diffusion and metabolism, thus to increase exchange of water inside and outside the cell membrane. It is favorable for excretion of injurious acid metabolic and wastes, metabolism promotion, immunity improving and excessive free radical removal.

## ANION ENERGY STONE

Release anions to trigger water molecule resonance in order to thin the big clusters of water to small clusters. In the shape of ball particle, it may transform to small clusters of water under the resonance of energy stone. It can help nutrition absorption, promote metabolism and improve immunity.

# Experiments of Energy Life Water

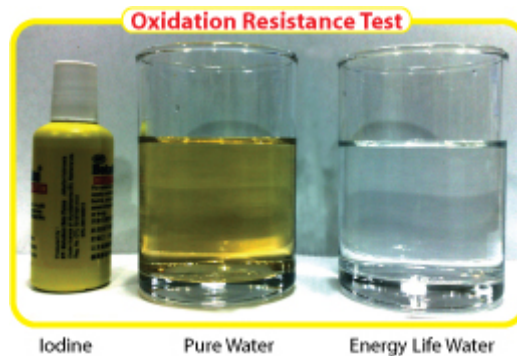

## Experiment 1

**Increased nutritional and physiological functions through easier absorption of water.**

Make Chinese tea separately with cold pure water and cold Energy Life Water; wait for 2 minutes, the difference of the extended tea can be clearly observed.

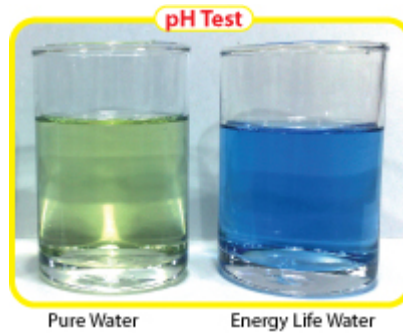

## Experiment 2

**Alkalescence, to neutralize the unnecessary acid substance**

Energy Life Water is alkalescent, which can neutralize the acid substance in human body. Dropping pH test solution into Energy Life Water and pure water, their pH value can be tested according to water colour in contrast to pH Test Colour Chart. Hence, we can regulate our drinking habit and help us to maintain healthy.

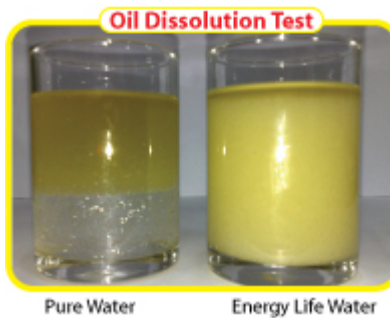

### Experiment 3

#### **Negative potential, to clear free radicals**

Free radicals, also named as aging factors, are the origin of cells and tissue damage. Drinking healthy water with negative potential frequently can effectively prevent age pigment, cataract, arteriosclerosis and cerebral apoplexy caused by free radicals.

### Experiment 4

#### **Small molecule group, with strong dissolving capacity and emulsifying power**

Small molecule groups, as the active water for life, each of which consists of 5~7 water molecules with the half-amplitude duration of nuclear magnetic resonance spectrum not greater than 100Hz, can effectively clear the harmful substances such as cholesterol, triglyceride and unnecessary fatty acid in human's gastrointestinal system and blood, especially for the people with cardiovascular and cerebrovascular diseases.
